

Technology Commercialization Internship

U.S. DEPARTMENT OF
ENERGY

Office of
TECHNOLOGY TRANSITIONS

The Technology Commercialization Internship Program provides paid opportunities for undergraduate students to explore and contribute to advances at the intersection of business and innovative technologies like machine learning, artificial intelligence, computing, data science and biofuels. Students undergo intensive training as they join the U.S. Department of Energy's (DOE's) world-class national laboratory system, boost entrepreneurial thinking, and explore market opportunities.

OTT strongly believes in a diverse workforce for the next generation of technology commercialization professionals. Students from disadvantaged communities, underrepresented groups in science, technology, engineering, and mathematics (STEM), and Minority Serving Institutions are encouraged to apply.
