

REU 2024

Research Experience for Undergraduates

As a participant in the NSF-funded REU program in Physics And Astronomy at TCU, you will:

Collaborate on a research project with TCU faculty mentors, graduate students and other students.

Learn about working in industry through behind-the-scenes field trips.

Develop skills in giving research presentations.

Participate in a short course on research ethics

Receive a \$5400 stipend, free housing on campus, travel support to/from TCU, field trips, access to library and recreation facilities, and paid travel expenses to a scientific conference to present your
