

Brigham Young University Fletcher Research Internship

June 1 - August 7, 2026

FRI is an opportunity to prepare for graduate-level research at BYU

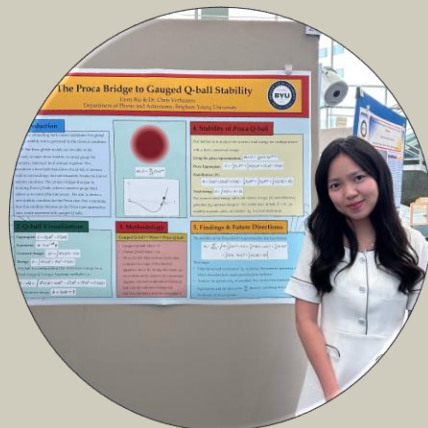

Explore summer research with many projects to choose from and topics ranging from Particle Physics to Nanomagnetism to Galactic Astronomy

Experience one-on-one mentorship, use state of the art labs and experience what it's like to be a BYU graduate student

Interact with students from around the world and enjoy exciting excursions to one of Utah's Mighty 5 National Parks, Timpanogos Cave, and beautiful mountain trails

Our 10-week internship includes \$7000 salary paid at an hourly wage, round trip travel expenses to Provo and housing assistance for the duration of the program*

International students currently studying in the US are encouraged to apply - funding available

Apply by February 3, 2026
reu.byu.edu

Supported by funds from the BYU College of Computational, Physical, and Mathematical Sciences

*Subject to terms of BYU off-campus housing
