

# Research Experiences for Undergraduates

Summer 2026 **REU** Program

The MagLab's Research Experiences for Undergraduates (REU) is an exciting summer program for college students interested in a science career by giving them the chance to work with MagLab scientists on an in-depth research project.

The MagLab REU program offers a wide range of research experiences in physics, chemistry, biological sciences, geochemistry, materials science and magnet science, engineering, and computer science. Participants work closely with MagLab mentors on a research project. Students also participate in weekly seminars and colloquia that broaden their knowledge of MagLab research and future careers.

- **Stipend:** \$6,500. If needed, travel support (up to \$800) and housing are available.
- **Program Dates:** May 26th – July 31st, 2026
- **Application Deadline:** January 9th, 2026
- Information and application for REU is available on the web at: [nationalmaglab.org/education/college-students/reu/](http://nationalmaglab.org/education/college-students/reu/) or by scanning the QR code
