

## Physics and Astronomy

EAST TEXAS A&M

Didn't get into a Ph.D. program? Unsure about graduate school? Want to strengthen your resume?

## Earn Your Master's at East Texas A&M University!

At East Texas, we value every student who walks through our doors. No matter your background, no matter your goals, here you are family. You can expect small classes and close, collegial interaction with faculty and fellow students. Whether it be academics, research, job preparation, or teaching -- pursue your passion in physics and astronomy!

### **M.S. in Physics** *Thesis Option*

Burnish your academics, hone your research skills and test the waters of a graduate education in our traditional face-to-face master's program. *A limited number of graduate assistantship positions remain!*

### **M.S. in Physics** *Non-thesis Option*

Prepare for a lucrative career outside of academia through a personalized set of courses, active research, and internships at high tech companies in the rapidly growing Dallas/Ft. Worth Metroplex.

### **Online M.A. in Physics** *Teaching Emphasis*

Build the future by teaching physics and astronomy! In this unique, fully-online program, you join a community of educators building their physics knowledge and pedagogical skills. Graduates often qualify to teach dual enrollment or community college courses<sup>\*</sup>.

<sup>\*</sup>Based on Texas requirements of 18 credit hours in major courses; requirements may vary from state-to-state. This program does not provide certification for secondary educators, but alternative certification for Texas residents may be available; ask for details.
